That they are content here to grow up in New Mexico, that they feel proud of New Mexico, and when they go east they feel just a little bit—just a little bit—sorrowful for those of us who have to live in that benighted country. But joking aside, my dear friends, I do congratulate you sincerely on the prospect which you can work out yourself, and which I doubt not you will work out in a way that will commend you to the people of the other United States. (A voice in the crowd): "One more star Mr. Taft." Oh, one more star! Oh yes, well you can see stars out here in this country with a great deal more purity than we do at home. How staidhood will come, it would be unwise for me to prophesy. Of course, you want it tomorrow morning. Well, you will not get it tomorrow morning. I sincerely hope that you will get an enabling act, and I intend to use all the influence I can to secure the passage of an enabling act at the next session of congress. Such an act has been introduced. It will have to go to a committee and be considered with reference to its provisions. I am in favor of deliberation with respect to the process by which you come into the Union. I am so convinced that it is better for you to take a little time in getting up your constitution and determining among

A hat full of coal lasts all night in COLE'S HOT BLAST

in a Cole's Hot Blast burns all night, and in the morning instead of building the fire, shivering in a chilled room and waiting for the fire to heat up, you open a draft only.

And there is fuel enough left to warm up nicely.

We not only say this. We guarantee it, and our word is backed by the largest manufacturer of soft coal heaters in America.

We guarantee a saving in fuel of a third. This is a conservative guarantee. You really save one-half to 80 per cent of your winter's fuel bill by using this stove.

In fact, our guarantee on Cole's Hot Blast is

STATEHOOD, SAYS TAFT

is dealing a little in imagination when he tells me these big figures. I like to have him think so, because if he does think so and if he is an optimist he is quite likely to make those figures good. You have a great sheep raising industry here. It indicates to me that the sheep is a mighty close browsing animal if he can get anything off these plains. I have no doubt that there must be something worth having if you can raise such stock as you can in this territory. In other words, traveling through here and first seeing the ground and then seeing the people and then talking to them gives you a kind of exhilaration. Why you feel as if you stood at the bottom of a great chimney and the flue of the hopes of the inhabitants was just carrying you up in it, and when I feel that way you may know it is a pretty good flue. One thing I like out here; I have not heard preached in any way the doctrine of discontent. The only thing you are discontented with is that you have not a greater opportunity, and that is the kind of discontent that we ought to encourage.

The great object of the American civilization and the American method of government is the promotion of equality of opportunity, and that I think you have out here in perfection. There is certainly lots of land, and there is certainly lots of opportunities to improve that land if you will, only put muscle and the elbow
